Frequently Asked Questions
About the new mathematics offerings

1. **Does the CLEP test for College Algebra count for MATH 11009 or 11010?**
   The CLEP test for MATH 11011 can count for **either** MATH 11009 or 11010.

2. **Does AP credit for MATH 12001 count for MATH 11009 or 11010?**
   The credits earned count for MATH 11010 + MATH 11022.

3. **Can students place directly into MATH 11022 (Trig) at PASS?**
   If a student places into calculus, but hasn’t had any trig, that person should place directly into MATH 11022 (Trig) at PASS.

4. **If we follow the flow chart and a student places into MATH 10024 but is not planning to complete a major requiring MATH 11010, what is the correct placement?**
   This student should take MATH 11009, MATH 11008, or MATH 14001 depending upon her major. MATH 10024 is intended for those students who eventually plan to take a calculus course. MATH 11009 satisfies the college algebra requirement for those majors not requiring calculus.

5. **Some current students enrolled in the early Fundamentals or Core Math courses that they do not need MATH 10024 to continue into MATH 11010. Are these new math module requirements only for incoming students?**
   Absolutely not. Students currently in the early Fundamentals or Core Math courses **need to take** through MATH 10024 before continuing on to MATH 11010. The requirement applies to **ALL** students. You are NOT doing students a favor by advancing them without the necessary knowledge or skill.

6. **If a student transfers from another institution, are the transfer equivalency guides being updated to reflect proper transfer credit awards?**
   If a student transfers in from another Ohio university with college algebra credit under the new Transfer Assurance Guide, they may receive credit either for MATH 11009 or MATH 11010.

7. **We would also like a contact person in math. Currently, we are given to the receptionist. Is she the appropriate contact person?**
   Please see the Math Placement Guide for contact information for individual courses.
