

## Spring 2020 – MATH 42002/52002 – Prof. Laura Smithies

### Course Information

**Course:** Analysis II - 15466/ - MATH 42002/52002-001-202010.

**Semester:** Spring 2020.

**Meeting Times:** Monday, Wednesday, Friday, 12:05 - 12:55 PM.

**Meeting Place:** MSB room 106

### Professor

*Professor:* **Dr. Laura Smithies**

*Office Hours:* Mondays 11:15 - 12:00, 1:00-2:10

Wednesdays 11:15 - 12:00, 1:00-2:10

Fridays 11:15 - 12:00

by appointment.

*Office:* 204 Mathematical Sciences Building

*Office Phone:* (330) 672-9027 (Email is better)

*E-Mail:* [lsmithie@kent.edu](mailto:lsmithie@kent.edu) (email me from your kent.edu email)

*Website:* [www.math.kent.edu/~smithies](http://www.math.kent.edu/~smithies)

### Course Goals and Overview

This course will begin with review of Analysis I material. We will then cover the standard 42002/52002 topics: including continuity, differentiation, partitions, gauges and Riemann integration. This course also covers further development of infinite series, uniform convergence, and as time allows, introductions to several variable calculus and to metric spaces.

### Course Calendar

**MLK Day:** Mon. Jan. 20th (Holiday)

**Midterm:** Wed. March 4th

**Spring Break:** March 23 - 27 (Holiday)

**Final Exam:** Thursday April 30th, 10:15 AM - 12:30 PM (MSB 106)

## Spring 2020 – MATH 42002/52002 – Prof. Laura Smithies

### Course Requirements

Midterm	100 points
Final Exam	100 points
Homework	200 points ( <b>SCALED</b> )
Total	400 points

The exams are generally in-class, closed-book tests. The test dates are generally fixed, however changes maybe be announced via University email. The final exam is mandatory and comprehensive. Homework is due essentially every Wednesday, at the beginning of class. If necessary you may submit your homework by email to [lsmithie@kent.edu](mailto:lsmithie@kent.edu), however printed submissions are preferred. Unless you have a University Approved Excuse, late homework is not accepted. Solutions to the homeworks are distributed when the homework is collected. Your **Scaled** Homework score out of 200 is calculated by curving your homework point total. The homework curve generally includes dropping one or more homeworks and adding/or adding points.

### Grade Scale

Percent	Grade	Percent	Grade	Percent	Grade	Percent	Grade
93 - 100	A	83 - 86	B	73 - 76	C	63 - 66	D
90 - 92	A-	80 - 82	B-	70 - 72	C-	60 - 62	D
87 - 89	B+	77 - 79	C+	67 - 69	D+	0 - 59	F

Attendance and class participation will be considered in determining borderline grades.

The grade scale may be curved up (in students' favor) but will not be curved down.

### Attendance and make up policy

All students are expected to attend essentially every class. If missing a class is unavoidable, you are still responsible for all material covered and all announcements and assignments made during your absence. Students are also expected to complete assigned reading and home excercises, and to participate in class discussions.

**Full credit make up exams will not be given** except to those students who provide adequate documentation of a true emergency or appropriate university excused absence. See [www.kent.edu/policyreg/administrative-policy-regarding-class-attendance-and-class-absence](http://www.kent.edu/policyreg/administrative-policy-regarding-class-attendance-and-class-absence). If you will miss an exam, contact me as soon as possible at [lsmithie@kent.edu](mailto:lsmithie@kent.edu). Full credit late homework is only accepted for university excused absences. However, your two lowest homework scores will be dropped before your scaled homework score is calculated (See course requirements above.)

## Spring 2020 – MATH 42002/52002 – Prof. Laura Smithies

### Prerequisites

Unless you have instructor permission, to enroll in this class you must have completed one of the following courses, with a C or better.

MATH 4/52001 ANALYSIS I

MATH 22005 ANALYSIS GEOMETRY AND CALCULUS III

The essential point is that you should have studied of functions of several variables, including partial derivatives and multiple integrals. You will also need to recall some of linear algebra.

If you are enrolled in 52002, you must have graduate standing.

### Required Material

The KSU bookstore carries the following required material for this class:

TITLE: Introduction to REAL ANALYSIS    AUTHORS: Bartle & Sherbert

EDITION: 4th    ISBN: 9780471433316    PUBLISHER: Wiley

### Student Accessibility Services

University policy 3342-3-01.3 requires that students with disabilities be provided reasonable accommodations to ensure their equal access to course content. If you have a documented disability and require accommodations, please contact the instructor at the beginning of the semester to make arrangements for necessary classroom adjustments. Please note, you must first verify your eligibility for these through Student Accessibility Services (contact 330-672-3391 or visit [www.kent.edu/sas](http://www.kent.edu/sas) for more information on registration procedures).

### General Expectations

Each student is responsible for attending class regularly, carefully completing daily reading and homework assignments, coming to class on time and prepared, and actively participating in class. Any student having trouble with the material is responsible for seeking help from the instructor, tutors, or fellow students. Regardless of where you find help with this material, make sure that you write up each homework problem without aid from any source including your book or notes, as you will need to be able to do this on our midterm and final.

Reading is required before each class meeting. The lectures are designed to supplement and amplify your reading, not replace it. That means that you are expected to complete the reading assignment before class so that you can engage in a discussion of the material. Also, you will be accountable for information in the book that will not be covered explicitly in class. **You need to spend 10 to 15 hours per week reading our textbook or working on this material outside of our classroom.**

## Spring 2020 – MATH 42002/52002 – Prof. Laura Smithies

### Additional Information

- Every class has its own schedule of deadlines and considerations. To view the add/drop schedule and other important dates for this class, go to the Students Tools and Courses tab in FlashLine and choose either View or Print Student Schedule. To see the deadlines for this course, click on the CRN or choose the Drop or Add a Course link and click on the green clock next to the course under Registration Deadlines.
- The official registration deadlines can be found at <https://www.kent.edu/registrar/calendars-deadlines>. This site also gives the dates for the last day to withdraw from this class without receiving a grade of 'W' and the last day to withdraw from this class and receive a grade of 'W'. University policy requires all students to be officially registered in each class they are attending. Students who are not officially registered for a course by published deadlines should not be attending classes and will not receive credit or a grade for the course. Each student must confirm enrollment by checking his/her class schedule (using Student Tools in FlashLine) prior to the deadline indicated. Registration errors must be corrected prior to the deadline.
- University policy 3342-3-01.8 deals with the problem of academic dishonesty, cheating, and plagiarism. None of these will be tolerated in this class. The sanctions provided in this policy will be used to deal with any violations. If you have any questions, please read the policy at <http://www.kent.edu/policyreg/administrative-policy-regarding-student-cheating-and-plagiarism> and/or ask. A condensed version of these policies is on our class website.

**This syllabus is a guideline but changes may be announced in class.**
