MATH 11012 Circle one: 8:50 5:30

Name: __

Intuitive Calculus

Spring 2011 Ms. Kracht

Score: /100 (110 pts available)

EXAM 2: Version A

NO CALCULATORS.

Multiple Choice: 10 questions at 3 points each.

Circle the letter of the best response.

Although your work will not be graded, you should write out complete and careful solutions to reduce the chance of error.

1. The graph $y = \log_2 x$ may be obtained by reflecting the graph $y = 2^x$ across

(a) the y-axis.

- (b) the *x*-axis.
- (c) the line y = x.
- (d) the origin.
- (e) none of these

2. Express as a power of $e: \frac{e e^{-5}}{e^{-2}e^4}$

- (a) e^0
- (b) e^{-2}
- (c) e^{6}
- (d) e^{-6}
- (e) none of these

3. True or False: If A, B > 0, then $\ln(A + B) = \ln A + \ln B$.

- (a) True
- (b) False

4. What is $\lim_{n \to \infty} \left(1 + \frac{1}{n}\right)^n$? (a) 0 (b) ∞ (c) e(d) does not exist (e) none of these 5. Find an expression for the value of \$300 deposited in a bank at 2.75% interest for 8 years compounded quarterly.

(a)
$$300 \left(1 + \frac{0.0275}{4}\right)^8$$

(b) $300 \left(1 + \frac{0.0275}{4}\right)^{32}$
(c) $300 \left(1 + \frac{2.75}{4}\right)^{32}$
(d) $300 \left(1 + 0.0275\right)^{32}$

- (e) none of these
- 6. A rich uncle wants to give you a nice graduation present. How much money must he deposit in a trust fund paying 5.75% compounded monthly at the time you enter college to yield \$5,000 when you graduate exactly 4 years later?
 - (a) $5000e^{-0.0575 \times 4}$ (b) $5000 (1.0575)^{-48}$ (c) $5000 \left(1 + \frac{0.0575}{12}\right)^{-48}$ (d) $5000 \left(1 - \frac{0.0575}{12}\right)^{48}$ (e) none of these
- 7. Evaluate: $\ln(\ln e)$.
 - (a) 0
 - (b) 1
 - (c) *e*
 - (d) undefined
 - (e) none of these

- 8. An investment grows by 3.5% compounded continuously. How many years will it take to increase by 50%?
 - (a) $\frac{\ln 1.5}{0.035}$
 - (b) $\frac{\ln 0.5}{0.035}$

(c)
$$\frac{\ln 1.5}{3.5}$$

(d)
$$\ln\left(\frac{1.5}{0.035}\right)$$

- (e) none of these
- 9. Suppose that at a price of \$4.50 per widget, elasticity of demand for Slimy Green Widgets is 1.2. If the price is increased, then demand should
 - (a) increase weakly.
 - (b) increase strongly.
 - (c) decrease weakly.
 - (d) decrease strongly.
 - (e) none of these
- 10. Suppose that at a price of \$137 per widget, elasticity of demand for Prickly Pink Widgets is 0.75. To increase revenue, the producer should
 - (a) raise the price.
 - (b) lower the price.
 - (c) leave the price alone; revenue is maximal for the current price.
 - (d) none of these

Long Answer Write all work carefully and neatly for full credit.

11. (20 pts) Find the derivative of each function, simplifying your answer.

(a) $f(x) = \ln(1 - x^3)$. (b) $K(u) = \sqrt{\ln u}$ (c) $y = x \ln x$ (c) $y = x \ln x$ (d) $g(t) = \frac{2 - e^t}{3 + e^t}$ 12. (5 pts) Find the **second** derivative of $f(x) = e^{x^2}$.

14. (5 pts) Suppose the demand function for Sparkling Purple Widgets is $D(p) = 5000e^{-0.03p}$ widgets at price p dollars per widget. Find the elasticity of demand, E(p), at a price of \$10 per widget.

- 13. (5 pts) Let $f(t) = \sqrt{t-3}$, where t represents time in years. Find the relative rate of change of f at time t = 8 years. (Express it as a percentage.)
- 15. (5 pts) An investment of P dollars is made with an annual rate r compounded annually. After 1 year, the amount in the account is

$$P + rP = P(1+r).$$

DERIVE the formula for the amount in the account after 2 years. (That is, show where this formula comes from.)

- 16. (15 points) Let f be **continuous** on \mathbb{R} with f'(-1) = 0, f'(2) undefined, f''(-1) = 0, and f''(2) undefined.
 - (a) Fill in the blanks in the sign charts with the terms "increasing," "decreasing," "concave up," or "concave down." *Write them out!*

interval	$(-\infty, -1)$	(-1,2)	$(2,\infty)$
sign of $f'(x)$	_	_	+
behavior of f			
		·	

interval	$(-\infty, -1)$	(-1,2)	$(2,\infty)$
sign of $f''(x)$	+	_	_
behavior of f			

- (b) Give the x-coordinates of all of the following (or indicate "none").
 - i. critical points of f: x = ______ iii. relative maximum points of f: x = ______
 - ii. inflection points of f: x =

iv. relative minimum points of f: x =_____

(c) Sketch a possible graph of f labeling all important points (with ordered pairs) and indicating all behavior clearly.

- 17. (25 points) Let $f(x) = x^3 3x^2 9x$.
 - (a) Find the *y*-intercept(s) of *f*. Show work. Give the ordered pair(s).
 - (b) Find f'(x).
 - (c) Find the critical number(s) of f. Show work.

- (d) Find the *y*-coordinates of all critical points of f. Show work.
- (e) Construct a sign chart (with all factors as in class) for f'(x) and indicate the corresponding behavior of f.

(f) Find f''(x).

(g) Find the potential inflection point(s) of f. Show work.

- (h) Find the *y*-coordinates of all potential inflection points of *f*. Show work.
- (i) Construct a sign chart (with all factors as in class) for f''(x) and indicate the corresponding behavior of f.

(j) Sketch the graph y = f(x). Plot and label (with ordered pairs) all important points. Illustrate all aspects of the behavior of f found above clearly.
