

Students need to click on "Course Home," then the link to Temporary Access will appear. Once they click on that, a temporary access code will be visible. They need to copy and paste this when the prompt for the access code appears.

The screenshot shows a web browser window with the URL <http://digital.ellum.nextcollege.com/>. The browser tabs include "Kent State University ...", "Google", and "ALEKS -- A". The browser's address bar shows the URL. The page content includes a "Courses" section with a "course settings" link. Below this is a "Temporary Access" section with a "Temporary Access" link. The left sidebar menu is expanded to show "Course Home" with a sub-menu containing "Temporary Access", "Homework", "Quizzes & Tests", "Study Plan", "Gradebook", "Chapter Contents", "Tools for Success", "Multimedia Library", "Purchase Options", "Pearson Tutor Services", "Discussions", "Course Tools", and "Instructor Resources". The main content area contains the following text:

Temporary Access

The code below will allow you temporary access to your assignments and course materials. At the end of that time, you will be prompted again for a new access code. You will not be prompted for a new access code if you have purchased a new access code at that time.

Your Temporary Access Code:
