The Java 7 update 11 automatically changes the security level from Medium to High on PCs and Macs. This causes a Java security popup each time a user moves to a new page in ALEKS. Here are instructions on how to lower the security level back to Medium.

Windows

- 1. Open the control panel
- 2. Open the Java control panel
- 3. Click on the Security tab
- 4. Slide the security level to Medium
- 5. Click on Apply
