

Student Registration on Rational Reasoning and on iMathAS

1. First buy a workbook from the bookstore on campus. The workbooks are NOT available at Amazon or at other online bookstores. If you find a used one online, it is likely to be the wrong edition or NOT have the correct access code to the software.
2. Your workbook will come with online access to <https://rationalreasoning.net/>. Instructions for access (and an activation code) will be inside the front cover.
3. When you create an account at <https://rationalreasoning.net/>, it will automatically create an account for you in [iMathAS](#), and you will have the same username/password for both sites. At this time, you will have access to the online homework system. iMathAS is accessible from your Rational Reasoning account by clicking on the “Online Homework” link in the upper left menu or [directly](#).
4. Another option is to go to <https://rationalreasoning.net/site/sign-up/> and purchase immediate access to Rational Reasoning online and a workbook will be sent to you.
5. Once in iMathAS, click on the “Enroll in a New Class” button and type in the Course ID and enrollment code. This information is on our syllabus.
