

Pathways Reading Guide M3 Sections 2 & 3

Please read Module 3, sections 2 & 3 in your e-book, pp. 16 – 24. (Click on Module 3, then “text.”)

Be sure to *read with a pencil in hand* and attempt the examples before you read the solution given. Take notes of important definitions and ideas as you read. I don’t expect you to have 100% comprehension of everything in the section, but spending significant time trying to understand the main ideas will assist you as you work on the Investigation during our next class.

Questions to answer as you read:

What is the domain of a function?

What is the range of a function?

Be sure you can find domains of functions like those given in Example 8 on p. 19.

What are the four representations of functions described in this section?

Be sure you can interpret function notation, as given in Section 3. This section discusses the material discussed in the video on p. 16 in the text.
