

# The Mathematical Sciences Undergraduate Colloquium

*presents...*

## Graduate School Panel

Friday, December 1, 2006

3:30 – 5:00 PM

MSB 121

Panel Discussion on  
Graduate School in Mathematics and Related Fields

Panel:

Dr. Joe Diestel, Mathematical Sciences, former Graduate Coordinator  
Dr. Kazim Khan, Mathematical Sciences, MSFE Program Committee  
Dr. Mark Lewis, Mathematical Sciences, Graduate Coordinator  
Dr. Judith Melillo, Mathematics Education, MAT Coordinator  
Mr. Tom Wakefield, Mathematical Sciences, Graduate Student

Abstract:

The panelists will field your questions about graduate school in mathematics and related areas, such as the Master of Arts in Teaching (MAT) and Master of Science in Financial Engineering (MSFE).

For instance, how do I know if graduate school is right for me?  
Why should I consider attending graduate school in mathematics?  
Would a related graduate program such as the MAT or MSFE better suit my needs?  
How should I prepare for graduate school?  
What are the qualifications?  
How do I choose the right school and program for me?  
How do I apply for graduate school?  
What kind of financial assistance is available?  
What should I expect from my graduate school experience?

*Pizza will be served!*
